Subject: Microsoft Settlement

Mirosoft was the greatest driver for economic growth; it made computers available to everybody i the world helping the US and global economy. The big beneficiay has been the consumer while the competition tried and continues to try to derail such progress at the average people' expense. It is time to settle along the proposed terms so we can resume economic growth. It is not in the interest of the US and the average consumer to prolong this litigation. John Breyer, average consumer.
